linkedin.com/in/sanjai-kumar-r

Karur, TamilNadu

S SKILLS

- Java
- Python
- JavaScript
- SQL
- React.js
- Spring Boot
- JWT Authentication
- PostgreSQL / MySQL
- MongoDB
- Docker & Kubernetes
- Jenkins
- Microsoft Azure / AWS
- Linux

L LANGUAGES

- Tamil (Native)
- English (Fluent)

E EDUCATION

B.Tech in Artificial Intelligence & Data Science (2024 - 2028)

M. Kumarasamy College of Engineering, Karur

Academic year: 2025 - 2026

CGPA: 8.6 (up to 3rd semester)

P PROFILE

Results-driven Artificial Intelligence & Data Science undergraduate with hands-on experience building full stack and machine learning systems from architecture to deployment. Proficient in Java, Spring Boot, Python, and React.js, with a strong foundation in REST API design, data structures, and system design principles. Proven track record of delivering award-winning projects across web development and computer vision. Passionate about writing clean, scalable code and eager to contribute to backend, DevOps, and cloud-driven engineering teams, with a growing focus on CI/CD, containerization, and infrastructure automation.

P PROJECTS

COSMOGUARD

AI-Driven Digital Twin Framework for Autonomous Spacecraft Recovery

- Designed an AI-powered Digital Twin framework for autonomous spacecraft fault detection and recovery.
- Integrated AI-based anomaly detection, predictive health monitoring, and Digital Twin validation for safe onboard decision-making.
- Developed a self-learning recovery system to improve spacecraft reliability and mission continuity

Smart Alert

Intelligent Emergency Alert and Notification System

- Designed a machine learning-based system to identify emergency situations and send alert messages to relevant authorities.
- Implemented real-time notification mechanisms to ensure quick response and improved safety.
- Focused on accurate detection and timely communication during critical scenarios.

IntraLink

Citizen Issue Reporting and Monitoring Web & Mobile Application

- Developed a web application that allows citizens to report issues and authorities to monitor and resolve them.
- Implemented real-time updates using Socket.IO for live tracking of reported issues.
- Built a mobile application to improve accessibility and user interaction across platforms.

A ACHIEVEMENTS

- Microsoft Student Ambassador and Google Student Ambassador, recognized for promoting developer technologies, organizing technical initiatives, and engaging with the student developer community..
- Ranked 1st among all project teams at the M. Kumarasamy College of Engineering Project Expo, recognized for technical depth and real-world applicability of the solution.
- Won 1st Place in the "Stranger Thinks" Idea Pitching Competition (Unstop Igniters Club), competing against multiple teams on innovation and business viability.
- Placed 2nd in the GDSC QuizX Competition, outperforming peers in a fast-paced technical and analytical challenge.
